WORK BACKGROUND

Front End Developer

ImagiNET Ventures | August 2018 - present

- Design, build, or maintain web sites, using authoring or scripting languages, content creation tools, management tools and digital media.
- Created, hosted and maintained Wordpress and Magento based sites, modified Plugins and Templates.
- Creating modular, responsive templates using modern CSS techniques and JavaScript libraries.
- Working directly with client stakeholders to develop technical solutions for business cases.
- Assisting with the transition from a waterfall method to the more efficient Agile methodology.
- Leveraging responsive web frameworks to complete deliverables ahead of schedule.

PROJECTS

LetMe-Save

http://13.232.187.41/frontend/
eCommerce web application with multi user role. The front end is completely done with Vue.js (Nuxt.js).

TNQ

http://imaginetventures.us/
A very specialized web application for a publishing company to automate their internal process of reference styling. Front end is built with Vue.js. Consumes REST API from laravel backend.

RANGROOP

https://rangroop.in/
eCommerce website for a Chennai based fashion designer. Built using Magento 2 and the default Luma theme as a base
